

AWAIS MANZOOR

Frontend Developer & AI Engineer

📍 Ward #13 Makri, Muzaffarabad, Pakistan | 📞 +92 328 8658326 | ✉️ awaismeer019@gmail.com
🌐 GitHub: github.com/AwaisManzoor326 | 🌐 Portfolio: mygeneralportfolio.netlify.app

TECHNICAL SKILLS

Languages & Frameworks: Python, JavaScript, C/C++, React.js, FastAPI, Flask, HTML5, CSS3, Tailwind CSS

AI & Machine Learning: Generative AI, Llama/Qwen Models, RAG Pipelines, 4-bit Quantization, LoRA Fine-Tuning, SVM Classifier, Feature Engineering

Core Competencies: Problem Solving, Clean & Reusable Code, API Integration, Logical Thinking, Time Management

PROFESSIONAL EXPERIENCE

Generative AI Intern

April 2026 – June 2026

Arch Technologies (Remote)

- Built custom pipeline architectures and successfully contributed to speech-to-reasoning workflow implementations.
- Handled LLM processing pipelines, optimizing response efficiency and structured data parsing for production environments.

Web Development & JavaScript Instructor

January 2026 – April 2026

Nikon Institute of IT, Muzaffarabad

- Taught modern JavaScript paradigms and comprehensive frontend development workflows to professional IT aspirants.
- Conducted practical code-along bootcamps, performance reviews, and mentored students on modular UI architecture.

Frontend Development Intern

January 2026 – February 2026

CodeAlpha (Remote)

- Developed highly responsive, user-centric frontend interfaces using React.js and utility-first styling libraries.
- Integrated external REST APIs to manage dynamic client-side state transitions and data presentation smoothly.

KEY PROJECTS

DualMind Assistant (Multimodal Chatbot)

FastAPI, React.js, Llama, Qwen

- Engineered an end-to-end conversational companion utilizing a custom RAG architecture for specialized context retrieval.
- Implemented full duplex voice processing features allowing real-time speech input and low-latency audio response streaming.

LLM Fine-Tuning Pipeline

Llama-3, LoRA, 4-bit Quantization, Colab

- Adapted a foundational Llama-3 model for domain-specific medical applications via Parameter-Efficient Fine-Tuning (PEFT).
- Applied 4-bit quantization and LoRA parameters to successfully execute robust model tuning within restricted hardware budgets.

Phishing Website Detection System

Python, Flask, SVM Classifier, Scikit-Learn

- Architected an end-to-end security pipeline with structural feature extraction, achieving 95% accuracy using an SVM model.
- Deployed a production-ready Flask inference backend delivering instant URL risk predictions accompanied by confidence metrics.

EDUCATION & CERTIFICATIONS

BS Computer Science — University of Azad Jammu and Kashmir (6th Sem, CGPA: 3.8)

Nov 2023 – Present

Diploma in AI / ML — AJK IT Excellence Center (ITEC)

Graduated: Mar 2026

Diploma in Web Development — Corvit System Muzaffarabad

Graduated: Mar 2025

Diploma in Generative AI — PA HEC GenAI Training Program

Oct 2025 – Nov 2025
